President Johnson talking with three Indiana Tech students about the undeclared war between their countries. The President was on an afternoon stroll when he met the students. After talking with them, he invited them into the White House for a personal tour. While on the tour the President mentioned that he was glad that the Indian and Pakistanis students were still friends even though their countries were fighting.

President

Our yearbook, the *Kekiongan*, provides the memorabilia for each of us, students and faculty alike. It especially salutes our senior students, and we all join in wishing them, those great successes which they have envisioned and planned. For the rest of us, the yearbook serves as a challenge and a guidepost on what we can do the next year to improve upon this present year. Only as we accept the challenge to not only strive to accomplish more, but actually achieve this, do we make lasting and important contributions. May the *Kekiongan* serve both as a sounding-board and as a record of the challenges that we have accepted and accomplished and provide for us insights to do even more.

Departments

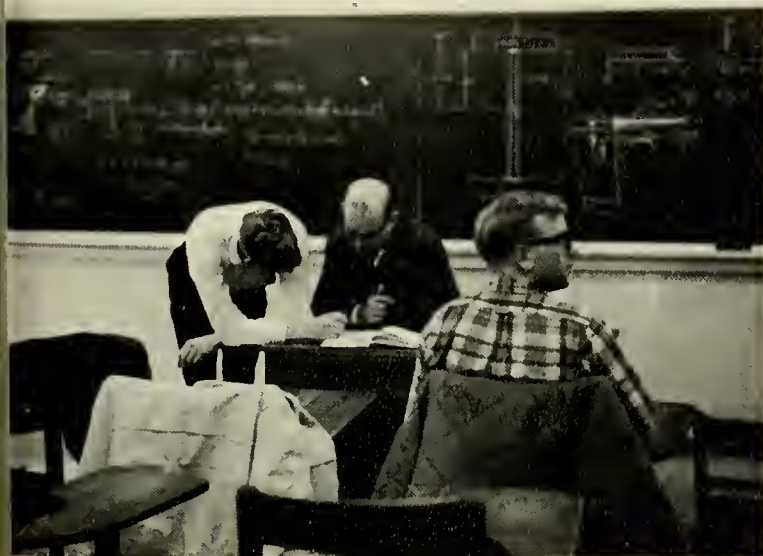

Benjamin Dow, Chairman; David Cormier, Bennett Kemp.

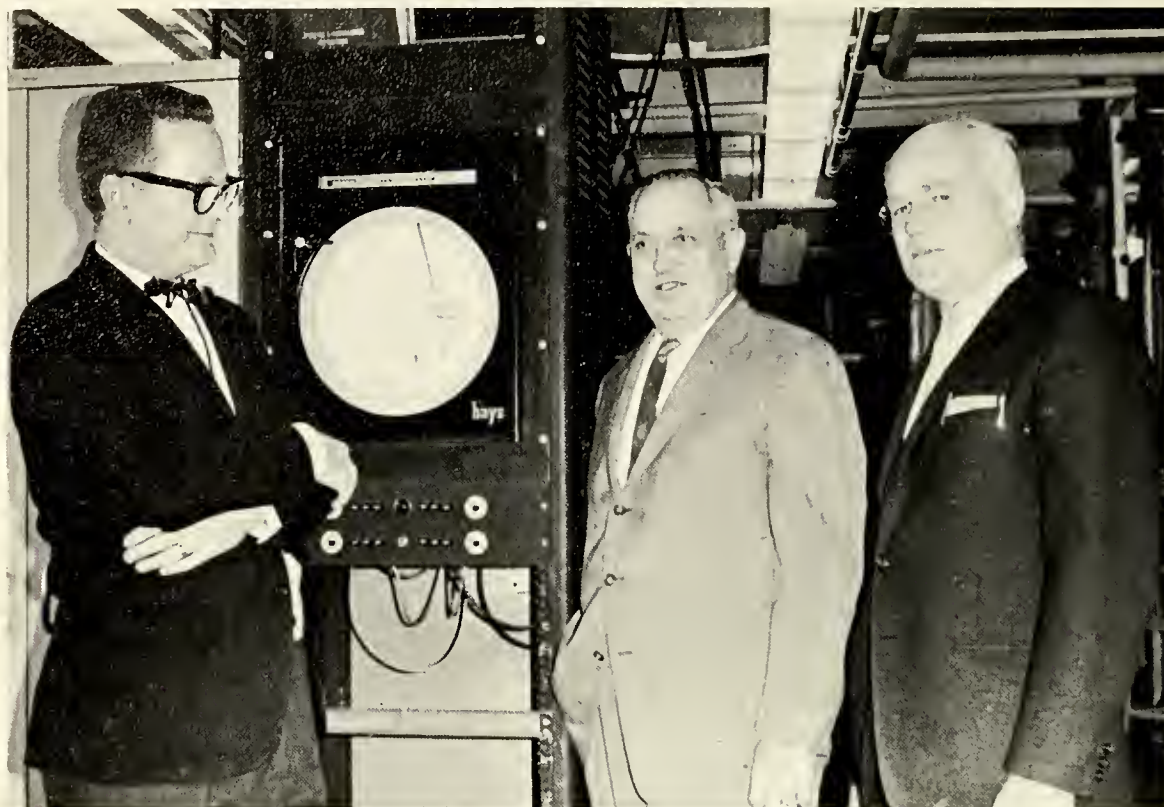

Aerospace

Today's aerodynamic courses are quite different from those of a few years ago since supersonic flow causes significant heating and thermodynamics has to be carefully taken into account. Earthbound navigation courses have been supplanted by special navigation. Structural analysis courses have shifted the emphasis from triangulated, determinant frames to the indeterminate, stressed-skin structures. Mathematics continues (in its radically advanced forms) to be an important tool in this field.

This department continues as one using the most advanced scientific information to help develop and produce modern means of transportation through space beyond.

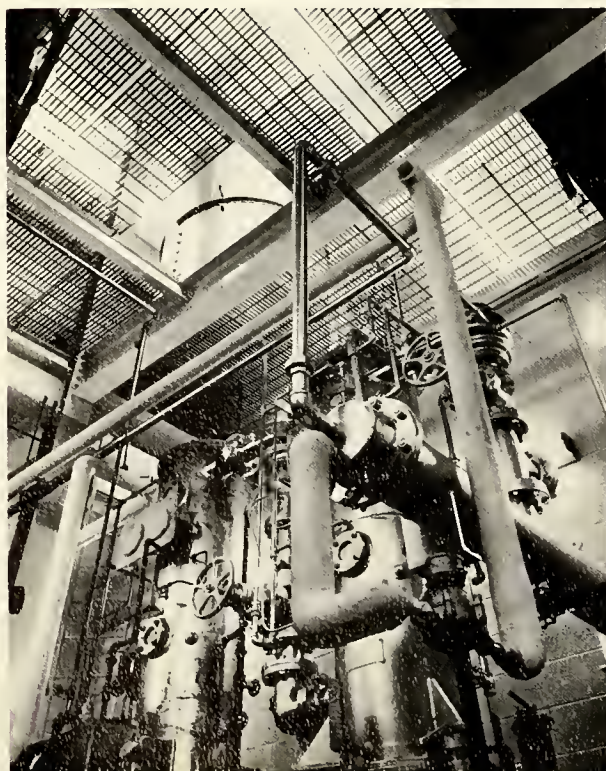

Bennett Kemp

Left to Right: Joseph W. Crammer, Dr. Tod G. Dixon, Chairman; John Cochran.

Chemical Engineering

The Department of Chemical Engineering Aims to develop the student into a well-rounded, competent, and socially adjusted graduate. The development of the ability to THINK is paramount. The project method of instruction is used in the laboratory which is equipped with standard pilot plant apparatus such as stills, evaporators, filter presses, and mass and energy transfer units. The curriculum covers basic sciences, engineering sciences, applied science (engineering), and general subjects, which gives a broad foundation enabling the student to be employed in design, operations, sales, teaching, and research.

Dr. Warren Hoffman, Chairman; Edward Guindon, Robert Swindell, Dr. Norman Long, Past Chairman; Dr. Robert Blair.

Chemistry

Dr. Warren Hoffman,
present Chairman.

Chemistry is the science of change, and serves as one of the main foundations for all science and engineering. It is one of the essential backgrounds for every educated man in the Technological Age.

The Department of Chemistry not only serves to provide instruction in basic chemistry for all science and engineering disciplines, but offers advanced courses in chemistry for those interested in research in industry or in further study in graduate schools.

Left to Right: Robert Ruhl, Donald Cochran, Dr. Petro, Chairman, William Schrader.

Civil Engineering

Civil Engineering is the oldest of all the engineering fields. It has always been concerned with projects of both public and private nature that affect the social and economic life of the people.

Originally, Civil Engineering was concerned with the construction of bridges, roads, buildings which are still major areas in the civil engineering field. In the last half-century, additional areas have been added to the field, such as, water supply, waste disposal, city planning, and traffic engineering. These are of importance for the public health welfare.

Peter Sorenson, Earl Devlin, Charles Kitchen, Charles Siskind, Gordon Johnson.

Electrical Engineering

Dr. Eugene Klingler, Chairman.

Dr. Eugene Klingler, Chairman; Richard Dermer, George Hatch, John Whitney, Arthur Price.

Electrical Engineering encompasses many and varied fields. The graduate electrical engineer may find himself working in the fields of radar, guided missiles and satellites, atomic energy, electronic computers, radio communications, television, control systems, power generation and distribution, and other numerous specialized phases of Electrical Engineering.

Lee Bernhardt, Chairman.

Engineering Graphics

The engineer must have a thorough knowledge of Engineering Graphics if he is not to be considered an engineering "illiterate." This is the language by which the engineer communicates with others of his profession, draftsman and technicians for whose work he is responsible to his employer, and others in his broad field of endeavor. Industry has indicated that it considers this one of the most important subjects of which a newly employed graduate engineer must have knowledge. Engineering Graphics assists in the development of creative ability by training in space visualization. It develops the powers of analysis and synthesis. It provides a superior means of developing and recording ideas for posterity. It is, in other words, a tool of great importance to all who anticipate a career in engineering.

Dwight Case

Left to Right: Vonne Muessling, Loren Yaggy, Margaret Huff, Mr. Lauer, Mary Weimer, Chairman; Darrow Fox, Helen Dinius.

English Department

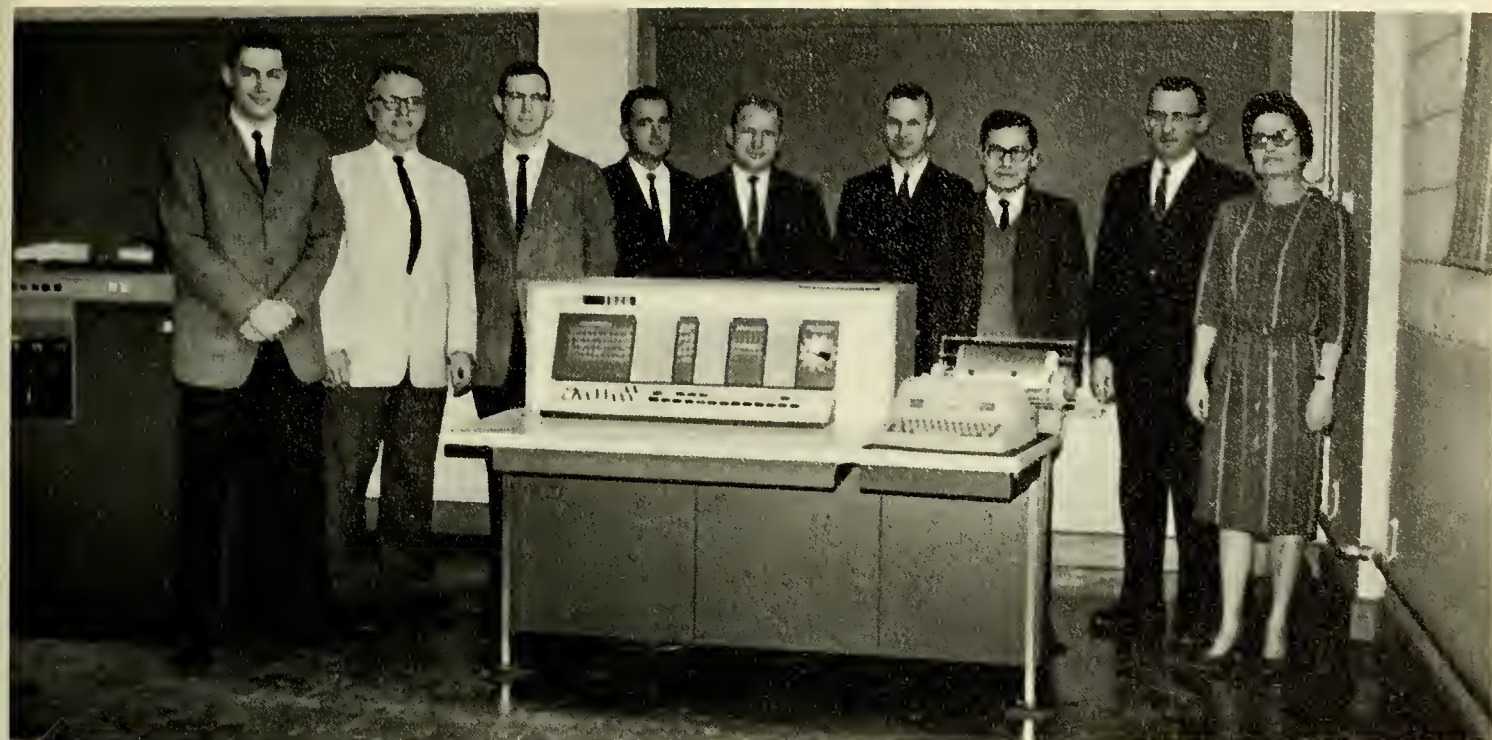

The primary purpose of the English Department in an engineering school is to teach the engineering student to express himself effectively in both speech and writing. The English Department offers courses in composition, literature, and speech so that the student may become a well rounded person able to meet the challenges in life.

Left to Right: Dr. Robert Bahney, David Schlundt, Dr. Meredith Sprunger, Department Chairman; Phillip Kennell. Standing: Paul Arnold, Loren Yaggy, Herbert Muessling, George Mendenhall, Robert Large.

Humanities Department

The Humanities and Social Sciences in the college curriculum present the Historic, literary, artistic and philosophical heritage of our culture along with the accumulation of knowledge in the behavioral sciences.

Left to Right: Stephen Kublank, Harry Mellen, Dwight Keck, Walter Bartlett, Jerald Van Meter, Charles Carr, Chairman; Hong-i Yang, Robert Leeper, Juana Santana.

Mathematics Department

In our complex society, scientific progress depends on the mathematician, the engineer and many other scientists whose primary tool is mathematics. The department of Mathematics offers a well rounded course for the young mathematicians, as well as the essential mathematics for the engineering, physics and chemistry students.

Charles Carr, Chairman.

Mr. Keck explains a point.

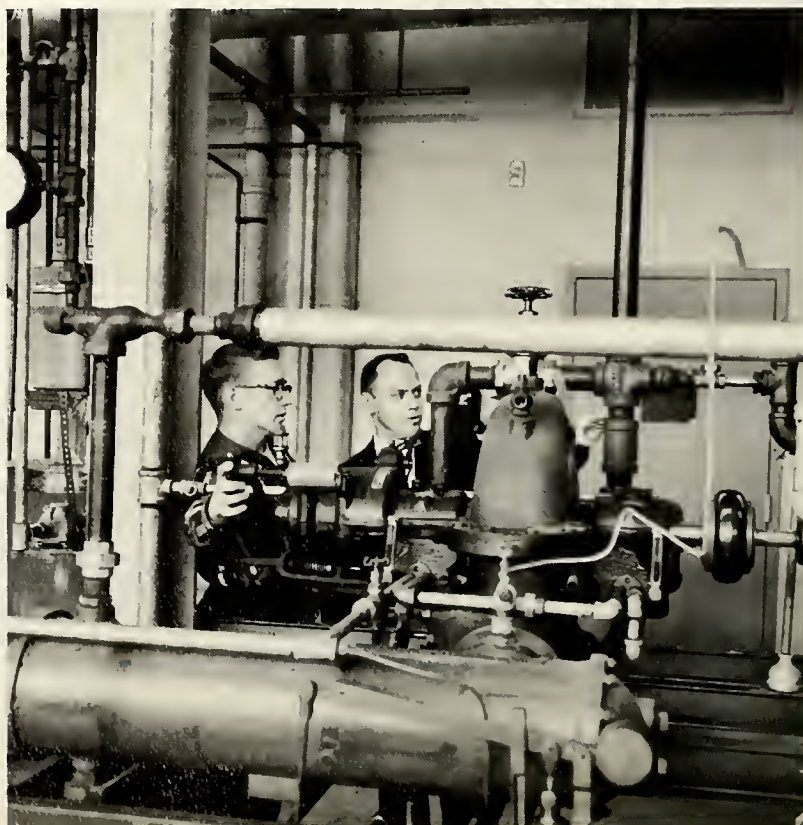

Left to Right: Cleo Quinn, Dr. Erwin Horiak, Howard Macklin, Robert Marshall, Dr. Ivan Planck, Chairman.

Prof. Cleo Quinn explains some of the intricate machinery in the mechanical engineering laboratory.

Mechanical Engineering

The Mechanical Engineer is responsible for the designing and building of machines to produce power and the machines to utilize that power. Every manufactured article, no matter what its nature, requires the services of Mechanical Engineers both in the design of the machines by which it is manufactured and in the operation of the factory itself.

Creative thinking is nurtured and encouraged in the Mechanical Engineering Laboratories.

Left to Right: Chimanlal R. Patel, Dr. Kozaburo Myakawa, Chairman; Orville Kern, Lionard Etter, Daniel Dwyer.

Physics Department

If, as has been said, "this is the atomic age," then this is the age of Physics. Nuclear weapons and machines are products of the physics laboratory. Each new day finds the physicist of our nation expanding the horizons of man's knowledge. Therefore, Indiana Institute of Technology meets the need for training in physics by offering basic and advanced courses designed to prepare a student either for direct participation in industry, or for a scientific career of the more traditional type.

Soccer

Due to lack of experienced players, Tech's soccer season was not the most profitable. Hustle and desire were the key points which at times put Tech in the winning column. Experience was perhaps the factor that was best gained from the season as numerous players will return next year with the promise of a much better season.

Jim Whitt

The 1965-66 basketball season with the Warriors sporting a fine 17-8 record. In spite of a loss to Anderson in the N.A.I.A. District 21 playoffs, it was a good year for the team. The winning of the M.C.C. with a 7-1 record and impressive victories of Hoosier College Conference foes made the season successful.

A quick look into the future sees the return of the entire squad barring grade problems etc. However, before we get too hopeful, it should be pointed out that next year's schedule will be the toughest in the history of the school. It must be the pains of progress.

American Chemical Society

The ACS student's affiliate of Indiana Tech is a Chapter of the American Chemical Society, the world's largest organization devoted to a single science. The purpose of this club is to create and stimulate interest among students of chemistry and chemical engineering and to help them academically and socially to become better qualified candidates for future positions.

Periodic field trips also help to acquaint the students with industry and give them insight into the vast potential of their chosen field.

First Row: R. C. Ruhl, Faculty Advisor, J. R. Association of Civil Engineers

The Association of Civil Engineers Of Indiana Institute of Technology is an organization of students and faculty in the civil engineering department.

The purpose of this organization is to attempt to communicate to the student some of the difficulties he will experience in his chosen field. This is accomplished by inviting as his guest speakers men from different branches of the civil engineering field.

First Row: Tommy Csenesitz, President; Bob Chatlosh, Secretary; Dave Cormier.
Second Row: John Claydon, Wendell Foo, Vice-President; Kenneth Fowler. *Third Row:*

American Institute of Aeronautics and Astronautics

The American Institute of Aeronautics and Astronautics is the representative society for engineers, designers, and technical specialists in all of the science related to the design and development of airborne craft.

Student membership provides the student engineer or scientist with broad opportunities to engage in activities associated with his future career in aviation.

First Row: George Sadakna, T. Kheiry, Nadiya Abweh. Second Row: Osama Albassan, Michael Helou, Hassan Sa'ad, Jamil Abu-Hamdeh, Abdul Jabbar, Christo Wassouf.

Arab Student Club

The objectives of the Arab Student Club are: the promotion of better understanding with the American people, the dissemination of true and accurate information about the Arab people, the extension of help and guidance to Arab students at Indiana Institute of Technology, and the securing of scholarships for the benefit of Arab students. Membership in this organization is available to any Arab student and any student interested in the Arab world.

Chemical Engineering Society

The Chemical Engineering Society is open to any student in Chemical Engineering. Its purpose is to help develop the student in his profession disseminating knowledge relating to the practice and theory of chemical engineering for him.

First Row: B. L. Dow, Dave Farkas, Bill Scheyer, Steve Randall, Richard Stone, Lew Chung. Second Row: S. P. Bennett, Tom Walton, Jeffrey Farnsworth, Pete Leffe, James Cunningham. Third Row: Bud Woods, Lewis Starr, Mike Richardson, Tom Sundstrom, Alex Skoczylas, Gary Henman.

Tech Flying Club

The Indiana Tech Flying Club was formed to give members an opportunity to fly, to obtain their licenses and to learn to fly at a minimum cost. Day and night, local and cross-country flights are made at slight expense to the members. The organization has two planes; a Cessna 140 and a Cessna 120, both of which are hangared at Smith Field. Membership is open to all students and faculty of Indiana Institute of Technology.

Indiana Tech Students' Wives Association

Organized in July of 1957, the purpose of Indiana Tech Students' Wives Club has been to further social activities, acquaintances, and friendship among the wives of students of IIT. Wives of all married students of IIT are eligible for membership.

The club arranges programs of varied types for the members. These range from an address on the social problems of our time by a local authority to bingo or a humorous skit given by members of the Club.

It is also the purpose of Indiana Tech Students' Wives Club to contribute to and work for the good of the College whenever possible.

At banquets held twice annually wives of graduating students are presented with their P.H.T. (Putting Hubby Through) degrees.

The International Club

The purposes of the International Club of Indiana Institute of Technology are:

1. To stimulate better student-to-student relationships and understanding through common activities, discussions, and debates on matters of international nature, and through these discussions, to acquaint the students with problems of the world, thus providing the students with the knowledge to converse intelligently on national and international problems;

2. To serve as an area for cultural exchange between both American and foreign students here on campus;

3. To be linking medium between all countries, for both the purpose of realizing and analyzing the differences and similarities of the student;

4. To help smooth the adjustment of new students to the cosmopolitan atmosphere on the campus of I.I.T.

Junior Inter-Fraternity Council

The purpose of the Junior Inter-fraternity Council is to prepare prospective fraternity men for some of the duties and responsibilities they will encounter as active members. They also assist the I.R.C. in planning the activities for Greek Week and other school functions.

The organization is composed of representatives from each fraternity pledge class.

First Row: John Rogers, Terril Johnson, Frank Goodman. *Second Row:* Kozaburo Myakawa, Advisor: Tiam Sak Asvaraksh, Bob Filipovits, Bob Baird, William Gregor.

Judo Club

The purpose of the Indiana Institute of Technology Judo Club is to promote Kosokan Judo on this campus. The club was founded in the spring of 1962 and was fully accredited with the school in December 1962. The club is a member of the National Collegiate Judo Association and is fully accredited by the Judo Black Belt Federation of America. The club is under the jurisdiction of the Chicago Black Belt Association and all promotions are sanctioned by this association.

Mechanical Engineering Club

The Mechanical Engineering Club is a local affiliate of the Ft. Wayne section of the American Society of Mechanical Engineers.

The objectives of the club are to advance, promote, and teach new phases of mechanical engineering. This is accomplished by programs which include talks by experienced engineers, and field trips to industries in the Tri-State area.

Membership is restricted to students enrolled in the Mechanical Engineering Department.

Iota Tau Kappa

Iota Tau Kappa is an honorary engineering fraternity whose name symbolized Iota (Industry), Tau (Thrift), and Kappa (knowledge). The chief objective of this Organization is to promote and to inculcate high ideals and attitudes of scholarship among the members of the student body of Indiana Institute of Technology. In order to become a member of Iota Tau Kappa, an engineering student must have a grade point average of 3.5 or more for four terms, not necessarily consecutive terms. At least sixteen credit hours shall comprise each of these terms.

Kappa Alpha Psi

Kappa Alpha Psi, a college fraternity now comprised of more than 200 undergraduate and alumni chapters on major campuses and in cities throughout the country, boasts a membership of over 20,000. It was founded in the school year of 1910-11 on the campus of Indiana University at Bloomington, Indiana. Its constitution is the law of an organization predicated upon and dedicated to, the principles of achievement through a democratic fraternity.

Preparation for the coat of arms was completed during the summer of 1911 by three of the founders who solicited the aid of a professor of Greek art at the Indiana University, together with that of a professor at Concordia University. The second chapter of Kappa Alpha Psi was chartered in 1913.

Tau Kappa Epsilon.

Tau Kappa Epsilon Fraternity was founded at Illinois Wesleyan University, Bloomington, Illinois, January 10, 1899, as a new fraternity in which its members would be chosen "... not for wealth, rank or honor, but for personal worth and character." As Tekes, we stress character, mental aptitude, health, and physical strength, and proficiency in social graces. With these ideals we have grown to be one of the largest social fraternities with 213 chapters in forty-one states and provinces of Canada.

Lou Culp, director of Public Relations, and Winifred Troyer, secretary.

Public Relations

The Public Relations Department has three principal areas of responsibility: the writing, editing, and printing of most of the college's major publications; writing and releasing news stories to local, state, and national press, radio, and television; and the planning of special events, which covers many activities ranging from the Artist-Celebrity Series and Commencement programs through a variety of luncheons, dinners, tours of the campus, and so forth.

The department is a service organization which cooperates with all other departments and divisions of the college. The Public Relations Department is available in an advisory capacity to student organizations, often assisting with the planning and promotion of student events when such activities relate to the public image of Indiana Tech. The essential purpose of the department is to *define* and *explain* the college to all segments of the general public.

Left to Right: Janet Foss, Executive Secretary, and Paulette Miller, secretary.

Tech Alumni Association

The Alumni Office is directed by an executive secretary, who is responsible to the board of directors of the Indiana Tech Alumni Association and to the administration of the college.

All graduates of the college become members of the National Association when they graduate. Alumni do not pay membership dues but, instead, are asked to give to the Alumni Support Fund which provides the funds to underwrite operational costs and salaries.

The Association looks on each student as a potential alumnus who will some day become a vital part of the foundation on which the college is built.
